

Polyflex product bulletin December 2009

2580N-32V80 Black Eagle 2

Black Eagle hose is a second-generation hose that can replace steel pipe. Built for oil-field and offshore high-pressure specialty drilling applications and can also be used in largeflow, high-pressure hydraulic applications.

Improved Features

- Improved cover bonding, polyurethane cover, able to better meet the demands of the environment on land and subsea
- Increased external collapse resistance
- Fatigue life extended
- No- skive fitting assembly
- New fitting

Advantages

- Working Pressure up to 10,000 Psi in well operations
- Long lengths up to 600m
- Easy assembly, Quick deployment and recovery.
- Compared to the alternatives, the flexibility and low weight give many operational advantages.
- Fewer potential leak paths.
- Smooth bore/low volume expansion design and less pressure drop

- With Abrasion-Resistant Polyurethane Cover (ColorGard) for safety and easy handling

New state-of-the-art facility

FPI Imports to meet the global demand for thermoplastics hoses in the offshore industry. Expansion plan continues despite the current economic slowdown. This new state-of-the-art facility has been designed to meet high standards

- Energy-efficient and high spec computer-controlled equipment
 - New Spiraling technology allowing longer continuous length potential
 - Improved handling equipment
 - New testing lab facilities
- Polyflex currently produces large

bore hoses for the well servicing market, hose bundles and umbilical control systems.
